IDENTITY IN TELECOMMUNICATIONS: GET IT OR CHECK OUT

Come see how Liberty Alliance specifications are being used to drive new business opportunities, lower operating costs and create new global partnerships.

Now more than ever, understanding the impact of identity is critical to every player in the telecommunications value chain. Understanding—and catering to—your specific customers and partners, and serving up the right services based on who, what, and where they are is revolutionizing the industry. Some smart players “get it”, and are embracing identity to change their business. Others are watching in the wings….and run the risk of being put out of business by more identity-aware competitors. With one billion Liberty-enabled identities and devices in the marketplace, you can’t afford to miss the chance to understand how it impacts your organization.

Agenda:
8:30 – 9:00 Registration, coffee, light breakfast
9:00 – 9:15 Introduction to Liberty Alliance: Our Vision, Our Goals, and Our Successes, Liberty Alliance
